Dictionary of Chemistry/Biology/Concise Science Dict/Cod Math, House Clapham Markt, Oxford University Press, 1997, . . .

, , , , , . .

(1868) J. W. Dawson in Proc. Amer. Assoc. Advancement Sci. XVI. 118 "These rocks..having been ascertained to be Devonian, there still remained an immense thickness of underlying rocks of uncertain age... It is proposed to call this series, represented in New Brunswick by the St. John slates, the Acadian Series. "

(1947) C. E. Skinner et al. Henrici's Molds, Yeasts, & Actinomycetes (ed. 2) v. 96 "The third order, the Moniliales.., contains the remaining forms, whose conidiophores are produced neither in pycnidia nor upon acervuli, but are formed from superficial hyphae over the entire surface of the fungus colony. "

(1928) J. T. MacCurdy Comm. Princ. Psychol. & Physiol. 168 " Adrian..found that, in the isolated fibre, the strength of the impulse, once it was set up, remained constant and could not be increased by augmenting the strength of the stimulus. This is known as the all-or-none law of the nerve impulse. "

(1961) Brit. Med. Dict. 106/2 "Anoci-association... The patient is kept free from fear by management and narcotics, remains in ignorance of the time of the operation, and is anaesthetized in such a way that no adaptive response is excited. The field of operation is completely blocked by local anaesthetics so that traumatic impulses do not reach the brain [etc..]"

(1882) J. D. Everett Vibratory Motion & Sound v. 51 "Comparing together the four positions of the string..points A, C, and A1 remain permanently at rest, and the points B and D midway between them undergo the largest displacement... The points of permanent rest, A, C, and A1 are called nodes and the points of maximum displacement, B and D, antinodes. "

(1306) Ord. Forest&ae., Act 34 Edw. I, v, "Quod haye et fossata facta medio tempore prosternantur et penitus commoveantur et adnichilentur, saluis arentacionibus nostris quas secundum assisam foreste volumus remanere. Transl. in Pulton: That the hedges and diches..shall be wholly cast downe, remoued, and avoided: saving our Arrentations which we will have remaine according to the assise of the Forest. "

(1902) H. J. L. Beadnell Prel. Note Arsinoitherium Zitteli 3 "Discovery of Eocene mammalian and reptilian remains made last year by the Geological Survey of Egypt... The most important of these is a large, heavily built, ungulate, about the size of a rhinoceros, and for which the writer proposes the generic name Arsinoitherium, from Queen Arsinoe, after whom the Fayum was called in Ptolemaic times. "

(1914) Q. Jnl. Geol. Soc. LXX. p. xcvi, "A bed was found, which yielded the incised drawings..as well as numerous mammalian remains and flint-implements; and this is regarded as of Aurignacian age. Immediately below the last-mentioned bed a deposit of sand..was penetrated..and this deposit, also referred to the Aurignacian, was found to contain an enormous number of bones. "

(1891) Jnl. Chem. Soc. LX. 1151 "Autocatalysis... The presence of a salt of the acid, for instance the sodium salt, in the solution, retards the formation of the lactone very considerably, and the amount of free acid in the solution, as determined alkalimetrically, remains constant for days together. "

(1540) Househ. Ord. Hen. VIII in Thynne's Animadv. Introd. 35 "The Clerkes-Comptrollers to goe with him to take the said Remaines to be advouched with him, what the expence shall rise to. Item..the Booke of Comptrollment..shall be put yearly into the Exchequer, to be advoucht to the Cofferers account."

(1940) Chambers's Techn. Dict. 77/2 "Barretter, an iron wire resistance mounted in a glass bulb containing hydrogen, and having a temperature coefficient so arranged that the variation of resistance produced ensures that the current in the circuit to which it is connected remains constant over a wide range of voltage. "

(1962) Gloss. Terms Automatic Data Processing (B.S.I.) 42 "Bootstrap, 1. A form of program input in which simple preset computer operations are used to read in initial instructions which in turn cause further instructions to be read until the complete program is assembled. 2. The process of using parts of a compiler to construct the remainder of the same compiler. "

(1870) E. R. Lankester in Q. Jnl. Geol. Soc. XXVI. 499, "I have..spent a good deal of time in working at the nodules, which I propose to call `\*Box-stones', since the name of `boxes' has been applied to those which exhibit the remains of a shell on being broken open by the phosphate-diggers of Suffolk. "

(1960) Lincs. Archit. & Arch&ae.ol. Soc. VIII. 70 "The word `briquetage'..can be used to include debris produced by so many different activities, from potting and salting to corndrying, and it can also include material which may be purely domestic, such as the remains of hearths and chimneys, or the clay walls of buildings which have been burnt."

(1975) A. D. Hechtman in McKinney's Consolidated Laws N.Y. 35 "Burglary in the third degree is committed when a person knowingly enters or remains unlawfully in a building with intent to commit a crime therein. If such a building happens to be a dwelling, and the invasion occurs in the night time,..the intruder is..guilty of the more serious crime of burglary in the second degree [etc.]. "

(1955) Times 26 Aug. 4/5 "In a conventional jet engine all the air is compressed and then heated by the injection of burning fuel, expanded through the turbine, and finally ejected at high velocity. In a by-pass engine only a proportion of the air is compressed and heated; the remainder by-passes the combustion system and turbine and rejoins the heated gases in the jet pipe, to mix with them and lower their temperature before the whole mixture is ejected at a lower speed than that in the `simple' jet engine."

(1885) J. Chamberlain in Cobden Club Dinner, Special Rep. 11 "It is only upon those terms that what will be known in history as the `Stop-gap' Government can invite the toleration of its opponents... I see no reason why they should not remain as caretakers on the premises-(great laughter and cheering)-until the new tenants are ready in November for a prolonged..occupation. "

(1900) C. E. McClung in Kansas Univ. Q. A. IX. 78 "The term `chromosome' being..restricted to the units of the division figures, there remains no name for the parts composing these when they are compound, as in tetrads and diads... I should like, therefore, to propose the term `chromatid' for each of these. "

(1954) Pei Dict. Linguistics 39 "Church Slavonic, the South Slavic language into which Kyrillos and Methodos translated the Gospels in the ninth century A.D.; it is extinct as a vernacular, but has remained the official language of the Slavic Greek Orthodox Church. (Also called Old Church Slavic and Old Bulgarian.)"

(1645) in Rushw. Hist. Coll. I. 52 "Two captains of the Club-men (as they were called) being a great number of the inhabitants of several parts of Wiltshire, and some counties adjacent, who gathered themselves together, alledging they did but stand on their own defence, to prevent Plundering; and that they would in that posture remain Neuters until the King and his Parliament should agree. "

(1826) Henry Elem. Chem. I. 540 "Nitrate of potassa is rapidly decomposed by charcoal at a high temperature..The products of this combustion..are carbonic acid and nitrogen gases. Part of the carbonic acid also remains attached to the residuary alkali, and may be obtained from it on adding a stronger acid. This residue was termed, by the old chemists, clyssus of nitre."

(1959) Chambers's Encycl. IX. 40/2 (heading) "The Combe Capelle Man. In 1909 Hauser..unearthed a skeleton in the rock-shelter of Combe Capelle..at the very base of a deposit containing Aurignacian implements... The remains are generally agreed to belong to the Cromagnon type,..though differing in some notable respects."

(1882) Everett Deschanel's Nat. Philos. &sect.759 "When there is equality between the two products of opposite resistances..the current in either of the two remaining branches will be independent of the electro-motive force of the battery in the other; and these two branches are still said to be conjugate."

(1767) Blackstone Comm. II. 169 "Contingent or executory remainders are where the estate in remainder is limited to take effect, either to a dubious and uncertain person, or upon a dubious and uncertain event; so that the particular estate may chance to be determined, and the remainder never take effect. "

(1897) Parker & Haswell Text-bk. Zool. II. 562 "In the Mole and the Bandicoot not only is there no decidua thrown off, but the fetal placenta with the distal portion of the allantois does not pass out after the fetus, but remains, and is broken up or absorbed in the uterus. Such a condition has been termed contra-deciduate."

(1901) Titchener Exper. Psychol. I. i. 19 "The contrast disc, with an extra 30° of white or black in its ring, is set up before its appropriate background. The contrast colour is matched upon the second mixer as before. Note that the same grey background must be retained for the second mixer, in order that the contrast relations may remain the same on both discs. "

(1873) Salmon Higher Plane Curves v. (1879) 134 "If any conic be described through four fixed points on a cubic, the chord joining the two remaining intersections of the conic with the cubic will pass through a fixed point on the cubic...This point..is called the coresidual of the system of four points... Two points which are coresidual must coincide."

(1956) J. K. S. St. Joseph in R. L. S. Bruce-Mitford Recent Archaeol. Excavations in Brit. 275 "In spring and early summer, differences in colour, density or luxuriance of growth commonly develop in response to hidden differences in the soil. These 'crop-marks', as they are termed, reveal to an observer, often in the finest detail, buried remains of which no trace can be seen on the surface. "

(1932) M. Eastman tr. Trotsky's Hist. Russian Rev. I. xv. 303 "'Our slogan..is pressure upon the Provisional Government..to induce all the warring countries to open immediate negotiations..and until then every man remains at his fighting post!' Both the idea and its formulation are those of the defensists. "

(1873) Maxwell Electr. & Magn. &sect.381 II. 7 "When a dipolar quantity is turned end for end it remains the same as before. Tensions and pressures in solid bodies, Extensions, Compressions

and Distortions, and most of the optical, electrical, and magnetic properties of crystallized bodies are dipolar quantities. "
