

The Expanded Family Life Cycle: Individual, Family, and Social Perspectives, Betty Carter, Pearson Education, Limited, 2010, 0205747965, 9780205747962, 517 pages. Now featured in a Classics Edition with a new Foreword by Donald Boch, The Expanded Family Life Cycle integrates theory and current research with clinical guidelines and cases by two of the most-respected authors, teachers, and clinicians in the field of family therapy, Betty Carter and Monica McGoldrick. This classic Family Therapy text provides a more comprehensive way to think about human development and the life cycle, reflecting changes in society away from orientation toward the nuclear family, toward a more diverse and inclusive definition of family. This expanded view of the family includes the impact of issues at multiple levels of the human system: the individual, family households, the extended family, the community, the cultural group, and the larger society. The text features a ground-breaking integration of individual male and female development in systemic context; our increasing racial, ethnic, and cultural diversity; the emergence of men's movements and issues; the growing visibility of lesbian and gay families; and the neglected area of social class. .
