Store Description: We specialize in children's books published during the Golden Age of Picture Books ~ from 1940 through 1980. Our stock mainly consists of of good or better condition, collectible children's picture books. We do not sell book club editions and have only a smattering of former library books for sale. We promise that the edition, condition and binding listed in our book descriptions are accurate with all flaws disclosed. Dust jackets and sometimes text pages are de-acidified to prevent foxing. If foxing is all ready present, the de-acidification halts further browning. All jackets are protected in archival grade Brodart sleeves. We are members of the Association of Booksellers for Children. That really doesn't mean much, it just looks good. We welcome any questions or comments about any aspect of children's picture book collecting. We also buy collections ~ from one copy to thousands. Contact us through the abebooks link. We also issue occasional print catalogs with inventory not listed online. If you'd like to receive these, please contact us through the abebooks link.

The PE Electrical Power Exam Review Course is a comprehensive series of workshop/seminars with on-line resources for today's engineering professional interested in preparing to pass the NCEES administered examination to become licensed as a Professional Engineer (PE) in Electrical Engineering (Power) that gives you a competitive advantage over your peers. The course is now part of Licensing Exam Professionals which has expanded the resources available for students to use to pass the exam on the first attempt.

All materials included in the course have been proven to lead to success in passing the PE EE Power Exam: Session presentations and problems, additional worked problems, self-diagnostic quizzes, and problem solving techniques and solutions are provided. Additionally, critical instruction on the use of the NCEES approved calculator, Casio FX-115ES Plus is provided and used throughout the course. This is a unique combination of live seminars/lectures, integrated problem solving, and self assessment.

Cost: Only \$1350 - includes live in-person workshop sessions, access to on-line resources and representative problems and sample tests, the Casio FX-115ES Plus Calculator, Power Reference Manual by John A. Camara (PPI book), PE Electrical Power License Review Study Guide by Howard A. Smolleck (Kaplan), and Principles and Practice of Engineering Electrical and Computer: Power Sample Questions & Solutions (NCEES).

With over 20 years of teaching FE and PE Review Courses both in the US and in Saudi Arabia, Dr. Kim knows what works for applicants to pass the exam. His clients have included (and continuing) include the Southern Company, UMBC, PEPCO, Shell Oil, San Onofre Nuclear Generations Station, and Saudi Arabian client companies. Your valuable time will not be spent on topical theory or "niceties". Instead, the course is tailored specifically to facilitate passing the PE Power Exam.
