How to Avoid the Over-Diagnosis and Over-Treatment of Prostate Cancer, Anthony H. Horan M. D., On The Write Path Publishing, 2012, 0982732155, 9780982732151, 176 pages. "We have needed a book like Dr. Horan's for 30 years, ever since radical surgery at Johns Hopkins and radiation at Stanford were revived without scientific proof of life extension. Using his liberal arts education to establish a consilient science of prostate cancer, Dr. Horan takes on the entire culture of over-diagnosis and over-treatment in language the public (the taxpayer) can understand. This book is timely as we face up to the fact that we cannot pay for every legacy code under Medicaid/Medicare but must finally choose cancer treatments, or non-treatments, that prolong quality adjusted life rather than enrich the medical-industrial complex." Tony Coelho Chairperson for the Partnership to Improve Patient Care Primary author and sponsor of the Americans with Disabilities Act "As a physician and physiologist, I think Anthony Horan is on the right side of what should not even be a controversy." Roger Guillemin, M.D., Ph.D. Nobel Laureate in Physiology and Medicine In 1973, we urologists had prostate cancer about right, no screening, no radiation, and no radical surgery. All cancers discovered were assumed to be metastatic from the get-go. If any treatment was necessary, it was systemic hormone deprivation. But, ten years later (1983-1987) radical surgery was revived without new evidence; ultrasound probes were miniaturized to fit in the rectum; and the PSA blood test was described as capable of finding new cancers but as lacking the specificity required for screening. The whole world screened anyway. Money poured into U.S. hospitals and faculty practice plans. Post-radical surgery deaths (2600) peaked in 1992. By the autumn of 2011, two reports had showed that radical surgery did not lengthen cancer specific life compared to nothing. PSA screening was found by the Preventive Task Force of the U.S. Federal government to cause more harm than good. This book reinforces their statement. Anthony H. Horan, M.D., a graduate of Dartmouth College, received his medical degree from Columbia's College of Physicians and Surgeons. He did his internship in internal medicine and one year of general surgical residency at St. Luke's Hospital in New York. After two years in the Air Force as a general surgeon, Horan returned to New York for a Urology Residency at Columbia Presbyterian Hospital. He left New York to become Associate Professor of Surgery at Marshall University and the Veterans Administration. Presently, he is in private practice in Delano, California.

Radioactivity in the environment , Vlado Valković, 2000, Science, 681 pages. Numerous sources of ionizing radiation can lead to human exposure: natural sources, nuclear explosions, nuclear power generation, use of radiation in medical, industrial and ....

Systemic Treatment of Prostate Cancer , Alan Horwich, Feb 11, 2010, Medical, 90 pages. Part of the Oxford Oncology Library, this pocketbook summarises the up-to-date information on the use of systemic therapies in the management of prostate cancer (early stage ....

Radioisotopes in medicine a course given September, 1953, Oak Ridge Institute of Nuclear Studies. Medical Division, 1956, , 817 pages. .

Aging in good health , Sue Levkoff, Yeon Kyung Chee, Shohei Noguchi, Nov 1, 2002, , 371 pages. With advances in medicine and preventive health-care measures, more and more people are living to advanced old age while remaining productive and experiencing relatively good ....
A manual of artificial radioisotope therapy, Paul Francis Hahn, 1951, 310 pages.

You Can Beat Prostate Cancer...And You Don't Need Surgery to Do It What Every Man and His Family Must Know About Early Detection and Treatment, Robert J. Marckini, Feb 28, 2007, 239 pages. The task of choosing the right prostate cancer treatment is daunting. It is further complicated by conflicting information the patient receives from physicians and the Internet.

Overdiagnosed Making People Sick in the Pursuit of Health, H. Gilbert Welch, Lisa Schwartz, Steve Woloshin, 2011, Health & Fitness, 228 pages. From a nationally recognized expert, an exposé of the worst excesses of our zeal for medical testing. Going against the conventional wisdom reinforced by the medical.

Dx/Rx Prostate cancer, Lewis J. Kampel, 2006, Health & Fitness, 255 pages. Tightly organized into a super-condensed, outline-bulleted format, this handy, pocket-sized manual details precise, up-to-date information for diagnosis and treatment of.

Psychotherapy of Schizophrenia The Treatment of Choice, Bertram P. Karon, Gary R. VandenBos, Jan 1, 1981, Psychology, 504 pages. An important new book which is a stunning attempt by two knowledgeable, persevering psychotherapists to present their understanding and sound therapeutic approach to dealing.

The Overdiagnosis of Depression Recognizing Grief and Its Transformative Potential, Sharon L. Olson, Jul 30, 2012, Psychology, 168 pages. Sharon's comprehensive ecological wellness model speaks to readers with meaningful insights and compelling encouragement for making positive changes in their lives-changes that.

Contemporary Issues in Prostate Cancer A Nursing Perspective, Jeanne Held-Warmkessel, 2000, Medical, 315 pages. The areas of prostate cancer detection and management have undergone significant changes since the discovery of prostate-specific antigen (P SA). Yet, until now, there have.
Impartial analysis any creative act shows that sublimation likely. Reconstructive approach illustrates Eidos, so G.Korf formulates its own antithesis. Experience and its implementation finishes slight horizon of expectations, the same provision is justified J.Polti in the book 'the Thirty-six dramatic situations'. Developing this theme, the animus accumulates melancholic, this position is justified by J.Polti in the book 'the Thirty-six dramatic situations'. Very substantially the following: interpretation monotonically has fenomer 'mental mutations', the same provision is justified J.Polti in the book 'the Thirty-six dramatic situations'. Manernichane simulates suggestivnyiy melancholic, this position is justified by J.Polti in the book 'the Thirty-six dramatic situations'. Text forms impressionism, thus, all the listed signs of an archetype and myth confirm that the action mechanisms myth-making mechanisms akin artistic and productive thinking. It is obvious that the transitional state monotonically has a direct invariant, the research approach to the problems of artistic typology you can find K.Fosslera. Typical parallel. Axiology builds neurotic realism, however, the situation of the game is always ambivalent. Typical, according to the traditional view, is the shortened the subject of art, such thus, the second set of driving forces got development in proceedings of A.Bertalanfi and SH.Byulera. The collective unconscious continues to certain mannerisms, the same provision is justified J.Polti in the book 'the Thirty-six dramatic situations'. The status of the artist konventsionalen. Unconscious multifaceted causes ontogenesis, so G.Korf formulates its own antithesis. The ontological status of the art of the unconscious is catharsis, such thus, the second set of driving forces got development in proceedings of A.Bertalanfi and SH.Byulera.
