The Savage Within

The Social History of British Anthropology, 1885–1945

Henrika
The Savage Within: The Social History of British Anthropology, 1885-1945, Henrika Kuklick, Cambridge University Press, 1991, 0521411092, 9780521411097, 325 pages. Considering the anthropological ideas of Britain between 1885 and 1945, this book explores the relationship between social scientific ideas and behavior. Professor Kuklick shows how the descriptions British anthropologists produced about the peoples of exotic cultures can be translated into commentaries on their own society. Read as such, the anthropology of the period covered by the book represents an appeal for a society that rewards individuals on the basis of talent and achievement, not inherited status; a brief for the welfare state, which is obliged to care for those whom circumstances have prevented from taking care of themselves; and a plea for tolerance of cultural diversity, based on observation of a range of ways of life that satisfy human needs and desires. The book also shows how anthropological insight informed consideration of such specific problems as the rights of women, the Irish, and all colonized peoples.

Images of Youth Age, Class, and the Male Youth Problem, 1880-1920, Harry Hendrick, 1990, Family & Relationships, 298 pages. Images of Youth demonstrates the significance, long underestimated, of the male adolescent in British society in the late nineteenth and early twentieth centuries. The male ....

The mandates system in relation to Africa & the Pacific islands, Elizabeth van Maanen-Helmer, 1929, History, 331 pages.
Considering the anthropological ideas of Britain between 1885 and 1945, this book explores the relationship between social scientific ideas and behavior. Professor Kuklick shows how the descriptions British anthropologists produced about the peoples of exotic cultures can be translated into commentaries on their own society. Read as such, the anthropology of the period covered by the book represents an appeal for a society that rewards individuals on the basis of talent and achievement, not inherited status; a brief for the welfare state, which is obliged to care for those whom circumstances have prevented from taking care of themselves; and a plea for tolerance of cultural diversity, based on observation of a range of ways of life that satisfy human needs and desires. The book also shows how anthropological insight informed consideration of such specific problems as the rights of women, the Irish, and all colonized peoples.

"The book will be of immense interest to scholars and their graduate students in many fields of social and natural science, specifically anthropologists and historians of science, of colonial and imperial processes, and of professionalization, as well as intellectual and cultural historians and others concerned with the social and historical as well as the intellectual processes that have contextualized and shaped the persuit of knowledge." Journal of Modern History

"Kuklick contributes a refreshingly different perspective to the ongoing discussion of the relationship of anthropology to colonialism in Africa....she elaborates a provocative and convincing thesis....raises crucial issues about the relationship of ideas to their institutionalization." African Studies Review

"For programmatic crises de coeur and jargonized intuitions, Kuklick has substituted a methodologically aware, finely tuned study of historical evidence. This work deserves a smooth passage into postgraduate reading lists wherever they mention Kuhn and the strange ways of 'science.'" Gerhard Baumann, Journal of Anthropological Research

Considering the anthropological ideas of Britain between 1885 and 1945, this book explores the relationship between social scientific ideas and behavior and shows how the descriptions British anthropologists produced about the peoples of exotic cultures can be translated into commentaries on their own society.

Dr. Kuklick has constructed the most wonderful and most well-reasoned history of anthropology that I have yet read. The author does not merely roll out many of the same old tired notions and lousy interpretations of movements and theorists, rather Dr. Kuklick provides much needed balance and nuance which the field badly needs. I see this work as a first step in a much larger process of anthropologists being forced to accept their history and deal with it in a less dismissive fashion than they frequently do. Many of them roll their eyes and sneer when asked about some of the more controversial ideas in the field's past but they need to realize the important impact that those theories had and Dr. Kuklick helps to provide this. Though the book can be radical at times, I hold that it is not radical enough in terms of demonstrating the reasons for the rise and fall of particular theories but I am very glad to see a work such as this available. Everyone in anthropology should read this book.
