A Color Atlas of Parasitology, John Thomas Sullivan, University of San Francisco, 2009, 096658077X, 9780966580778, . .

Color atlas of tropical medicine and parasitology , Wallace Peters, Herbert Michael Gilles, 1995, , 248 pages. (3E 1989) Describes arthropod-borne infections/infections acquired through the skin & mucous membranes/snake bites/etc.

Color atlas/text of ophthalmic parasitology , Benjamin Harrison Kean, Tsieh Sun, Robert M. Ellsworth, 1991, Medical, 233 pages. .

Gerald D. Schmidt and Larry S. Roberts' Foundations of parasitology , Gerald D. Schmidt, Larry S. Roberts, John Janovy, 1996, Science, 659 pages. .

Atlas of human parasitology , Lawrence R. Ash, Thomas C. Orihel, 1990, Medical, 262 pages. .

Ash & Orihel's atlas of human parasitology , Lawrence R. Ash, Thomas C. Orihel, 2007, , 540 pages. .

Case Files Emergency medicine, Barry Simon, 2005, Medical, 460 pages. The closest a student can get to the wards without seeing patients! 4 STAR DOODY'S REVIEW! "I think any student doing a rotation in emergency medicine would benefit from these

Color atlas and textbook of diagnostic parasitology , Tsieh Sun, Mar 1, 1988, Medical, 317 pages. .

Color atlas of clinical parasitology , Tomio Yamaguchi, Seiichi Inatomi, 1981, Medical, 293 pages. .

Parasitism The Diversity and Ecology of Animal Parasites, Albert O. Bush, 2001, Medical, 566 pages. Explains parasite biology as a branch of ecology - essential reading for zoology and ecology students..

Keys to the Trematoda, Volume 2 , David Ian Gibson, Arlene Jones, Rodney Alan Bray, 2005, Medical, 745 pages. This text, in three volumes, presents a detailed revision of the systematics and taxonomy of the plathyhelminth class Trematoda, subclasses Aspidogastrea and Digenea. These

Parasites, infections and diseases of fishes in Africa an update, Ilan Paperna, Dec 1, 1996, Nature, 220 pages. .

Veterinary Office Practices , Robert Kehn, 2004, Medical, 210 pages. Veterinary Office Practice fills a void in this area of educational materials since the book has equal emphasis on teaching the traditional responsibilities of the veterinary

Molecular Biology of the Cell , Bruce Alberts, 1989, Science, 1263 pages. .

New Guinea Tapeworms and Jewish Grandmothers Tales of Parasites and People, Robert S. Desowitz, 1987, Science, 224 pages. A medical ecologist examines the threat posed by disease-carrying parasites and insects and identifies the conditions--miracle drugs, destruction of natural controls--that have

The Role of Acanthamoeba Culbertsoni Serine Proteases in Abating Microglial-like Cell Cytokines and Chemokines , Jenica Ledah Harrison, 2009, , 85 pages. Using two-dimensional (iso-dalt) gel electrophoresis, we demonstrated that A. culbertsoni secrete factors that degrade culture medium proteins. Initial gelatin zymography

Comparative Parasitology, Volumes 67-68 , , 2000, Computers, . A semiannual journal of research devoted to helminthology and all branches of parasitology..

This atlas is intended as an aid to students enrolled in a laboratory course in parasitology. Specimens that are typically studied in such a course have been photographed with a digital camera and arranged in plates. A total of 1,373 parasite images are included on 135 plates. A brief explanation of each plate is on the facing page, emphasizing major characteristics of the parasite's structure, life cycle, and medical significance. Unlike previous laser- or solid ink-printed editions, the 8th edition has been commercially offset printed on 128 gsm glossy art paper with wire-o binding. A copy of the CD, "Electronic Atlas of Parasitology" is included with the printed atlas. All orders are shipped within 2 business days by USPS Priority Mail (usually 2-3 day arrival).

I think this book makes a great companion to any parasitology text. It covers the "major" parasites and some vectors in example photos of perfect clarity. If you must identify such specimens in the laboratory, this is a great reference book. Most examples you could come across will not be this clear, so the atlas will help you note the major differences between parasites, making identification easier. There is little or no "background noise" like there are on most slides available today so that you can focus on the parasite itself.

I recently acquired a copy of this book, and found it quite good, the photographs present throughout the book, were well done and good for a atlas to have near the microscope as more than representation of the parasite appears, a failing found in some of the more established atalses. The fact that all of the photos are photos and ther are a number of them makes the book usefull in the lab environment. The accompany burst with each photo is concise and free of extraneous detail. However there are two critisms, the book would fae better if printed on a water resistant paper and a stronger back and front cover which a fixed by adding by own stronger front and back cover. this relates to the spiral bound edition.

This is an excellent book and I highly recommend it to anyone taking a medical parasitology course, especially one with a laboratory component. The quality and scope of the images are outstanding, and everything we have covered in my parasitology class has been included in the book. It is a wise investment for anyone with a need to identify laboratory specimens of human parasites.

For anyone in need of a reliable parasitology guide, Sullivan's atlas is a wonderful addition to any medical library. The detailed frames of several medically important parasites provide examples of developemental stages, organismic features, and complete life cycles. The atlas also offers excellent distinctions between larval stages, and beautiful color imagery.

This atlas is intended as an aid for students in a Parasitology course. Such courses typically require students to learn the microscopic appearance of parasites using commercially available microscope slides. This atlas, consisting mostly of photomicrographs of these same specimens, hopefully will enable students to locate and study parasites independently, at the same time reinforcing lecture information with the textual description accompanying each photograph. --This text refers to an out of print or unavailable edition of this title.
