Cytokines in Cancer Therapy, Frances R. Balkwill, Oxford University Press, 1989, 0192617974, 9780192617972, . Cytokines, a broad class of proteins, have a role in fighting infection and in mounting an immune response; in mediating cell differentiation and embryogenesis; in promoting cell growth; and in inhibiting growth or causing cell death. Recent advances in cell culture, monoclonal antibodies and recombinant DNA technology have made it possible to isolate these proteins and to obtain sufficient quantities to conduct clinical studies as well as laboratory experiments. Thus, the foundations have been laid for a new form of cancer therapy and for understanding how abnormalities in the cytokine network could contribute to the process of malignancy. Up-to-date and comprehensive, this book brings together current research and discusses it in the context of its present and potential clinical application. The book is intended for cancer researchers, clinical oncologists, and those involved in the pharmaceutical and biological product industries..

Bianchetti: Webster's Timeline History 1628-2007 , , , , . .

Human monocytes , Marek Zembala, 1989, Science, 553 pages. Monocytes represent one of the major types of white blood cells in man which prevent infection by ingesting and killing invading pathogens and by releasing factors which

Tumour necrosis factor and related cytotoxins, Volume 131 , Gregory Bock, Oct 14, 1987, Medical, 241 pages. The number of factors implicated in the regulation of cell proliferation and differentiation is already considerable and more are continually being identified. This book

Superoxide dismutase, Volume 1 , Larry W. Oberley, Oct 5, 1982, Science, 168 pages. .

Catalogue of Cell Lines and Hybridomas , American Type Culture Collection, Robert Hay, 1994, Medical, 640 pages. .

Immunophysiology the role of cells and cytokines in immunity and inflammation, Joost J. Oppenheim, Ethan M. Shevach, 1990, Medical, 424 pages. This exciting new text describes how cells normally regulate immunological and inflammatory reactions, and how the immune system is intimately related to other bodily functions

The Regulation of proliferation and differentiation in normal and neoplastic cells , Emil Frei, 1989, , 219 pages. .

Cancer clinical trials methods and practice, Marc E. Buyse, Maurice J. Staquet, Richard J. Sylvester, 1984, , 481 pages. The first complete guide to organizing and running cancer clinical trials, this book brings together in a single volume information on the fundamental concepts of trials

Primary Chemotherapy in Cancer Medicine Proceedings of an International Symposium on Chemotherapy Preceding Surgery Or Irradiation in Cancer Medicine, Held in Valkenburg A/d Geul, the Netherlands, January 31-February 2, 1985, , 1985, Antineoplastic Agents, 403 pages. .

Progress in immunology VI , Bernhard Cinader, Richard G. Miller, 1986, Medical, 1135 pages. .

Lymphohaematopoietic growth factors in cancer therapy , Roland Mertelsmann, Dec 3, 1990, Medical, 90 pages. .

Concepts, clinical developments, and therapeutic ..., Volume 36; Volume 1987 , Franco M. Muggia, 1987, , 267 pages. .

Concepts, mechanisms, and new targets for chemotherapy , Franco M. Muggia, 1995, , 237 pages. Concepts, Mechanisms, and New Targets for Chemotherapy describes new interconnections between rationally designed and empirically discovered compounds. One route that has not
