In Search of the Multiverse: Parallel Worlds, Hidden Dimensions, and the Ultimate Quest for the Frontiers of Reality, John Gribbin, John Wiley & Sons, 2010, 0470926570, 9780470926574, 240 pages. Critical acclaim for John Gribbin "The master of popular science." "Sunday Times (London)" "Gribbin explains things very well indeed, and there's not an equation in sight." "David Goodstein, The New York Times Book Review (on Almost Everyone's Guide to Science)" "Gribbin breathes life into the core ideas of complexity science, and argues convincingly that the basic laws, even in biology, will ultimately turn out to be simple." "Nature magazine (on Deep Simplicity)" "Gribbin takes us through the basics [of chaos theory] with his customary talent for accessibility and clarity. [His] arguments are driven not by impersonal equations but by a sense of wonder at the presence in the universe and in nature of simple, self-organizing harmonies underpinning all structures, whether they are stars or flowers." "Sunday Times (London) (on Deep Simplicity)" "In the true quantum realm, Gribbin remains the premier expositor of the latest developments." "Booklist (on Schrödinger's Kittens and the Search for Reality).

Erwin Schrodinger and the Quantum Revolution , John Gribbin, Mar 15, 2013, Science, 336 pages. A lively, fascinating biography of the father of quantum mechanics by the bestselling author of the science classic, In Search of Schrödinger's Cat Erwin Schrödinger, best

Physics of the Impossible A Scientific Exploration into the World of Phasers, Force Fields, Teleportation, and Time Travel, Michio Kaku, Mar 11, 2008, Science, 288 pages. Teleportation, time machines, force fields, and interstellar space ships—the stuff of science fiction or potentially attainable future technologies? Inspired by the fantastic

We Need to Talk About Kelvin What everyday things tell us about the universe, Marcus Chown, Nov 5, 2009, Science, 250 pages. Look around you. The reflection of your face in a window tells you that the universe is orchestrated by chance. The iron in a spot of blood on your finger tells you that

God, the Multiverse, and Everything Modern Cosmology and the Argument from Design, Rodney D. Holder, Jan 1, 2004, Religion, 211 pages. In 'God, the Multiverse and Everything' Rodney Holder examines the question of whether the universe as we know it from cosmology can be said to exhibit design and so point us

From Cosmos to Chaos The Science of Unpredictability, Peter Coles, Jun 15, 2006, Mathematics, 216 pages. Looks at the role of probability in modern science. Using the developments in fundamental physics as examples, this book shows how central is the need to deal with uncertainty

Parallel Worlds The Science of Alternative Universes and Our Future in the Cosmos, Michio Kaku, Jan 1, 2006, , 428 pages. From the bestselling author of Physics of the Impossible, Michio Kaku's Parallel Worlds takes us to the frontiers of scientific knowledge to explain the extraordinary nature

The Future of Cosmology Predictions, John R. Gribbin, 1997, , 54 pages. .

Quantum Paradoxes Quantum Theory for the Perplexed, Yakir Aharonov, Daniel Rohrlich, Sep 26, 2008, Science, 299 pages. A Guide through the Mysteries of Quantum Physics! Yakir Aharonov is one of the pioneers in measuring theory, the nature of quantum correlations, superselection rules, and

The Labyrinth of Time: Introducing the Universe , Michael Lockwood, Apr 28, 2005, Science, 416 pages. Modern physics has revealed the universe as a much stranger place than we could have imagined. The puzzle at the centre of our knowledge of the universe is time. Michael

Einstein a life in science, Michael White, John Gribbin, Mar 1, 1995, , 279 pages. A biography of the archetypal scientist traces Einstein's monumental advances in thermodynamics and physics and offers a detailed appreciation of his profound influence on the
