

Mind Manipulation: Ancient and Modern Ninja Techniques, Haha Lung, Christopher B. Prowant, Kensington Publishing Corporation, 2002, 0806523832, 9780806523835, 192 pages. Modern methods of mind control--employed in propaganda, indoctrination, even advertising--can be traced back to ninja strategies of psychological warfare developed and refined centuries ago in medieval Japan. The ninja were accomplished in covert operations such as espionage, assassination, and sabotage, and were feared for their ability to break through an adversary's mental defenses and use his fears, insecurities, superstitions, and hopes and beliefs against him. This is a modern-day guide to ninja techniques, including: revelation of an enemy's deepest secrets, ways to implant false memories, how to detect when somebody is lying, and visualizations to affect physical health. You will also learn defenses against mind-manipulating techniques commonly used in media and politics.--From publisher description..
